

# metaprompt

Jeremy Nixon, Matt Brockman, Sasha Sheng, Aaron Omullan, Mehak Aggarwal, Julius Ritter

## The Idea:

**Metaprompt generates prompts and execution plans.  
executes on them and evaluates the result afterwards  
to optimize its output - no matter the task.**

**1. Write  
Screenplay**

**2. Code Entire  
App**

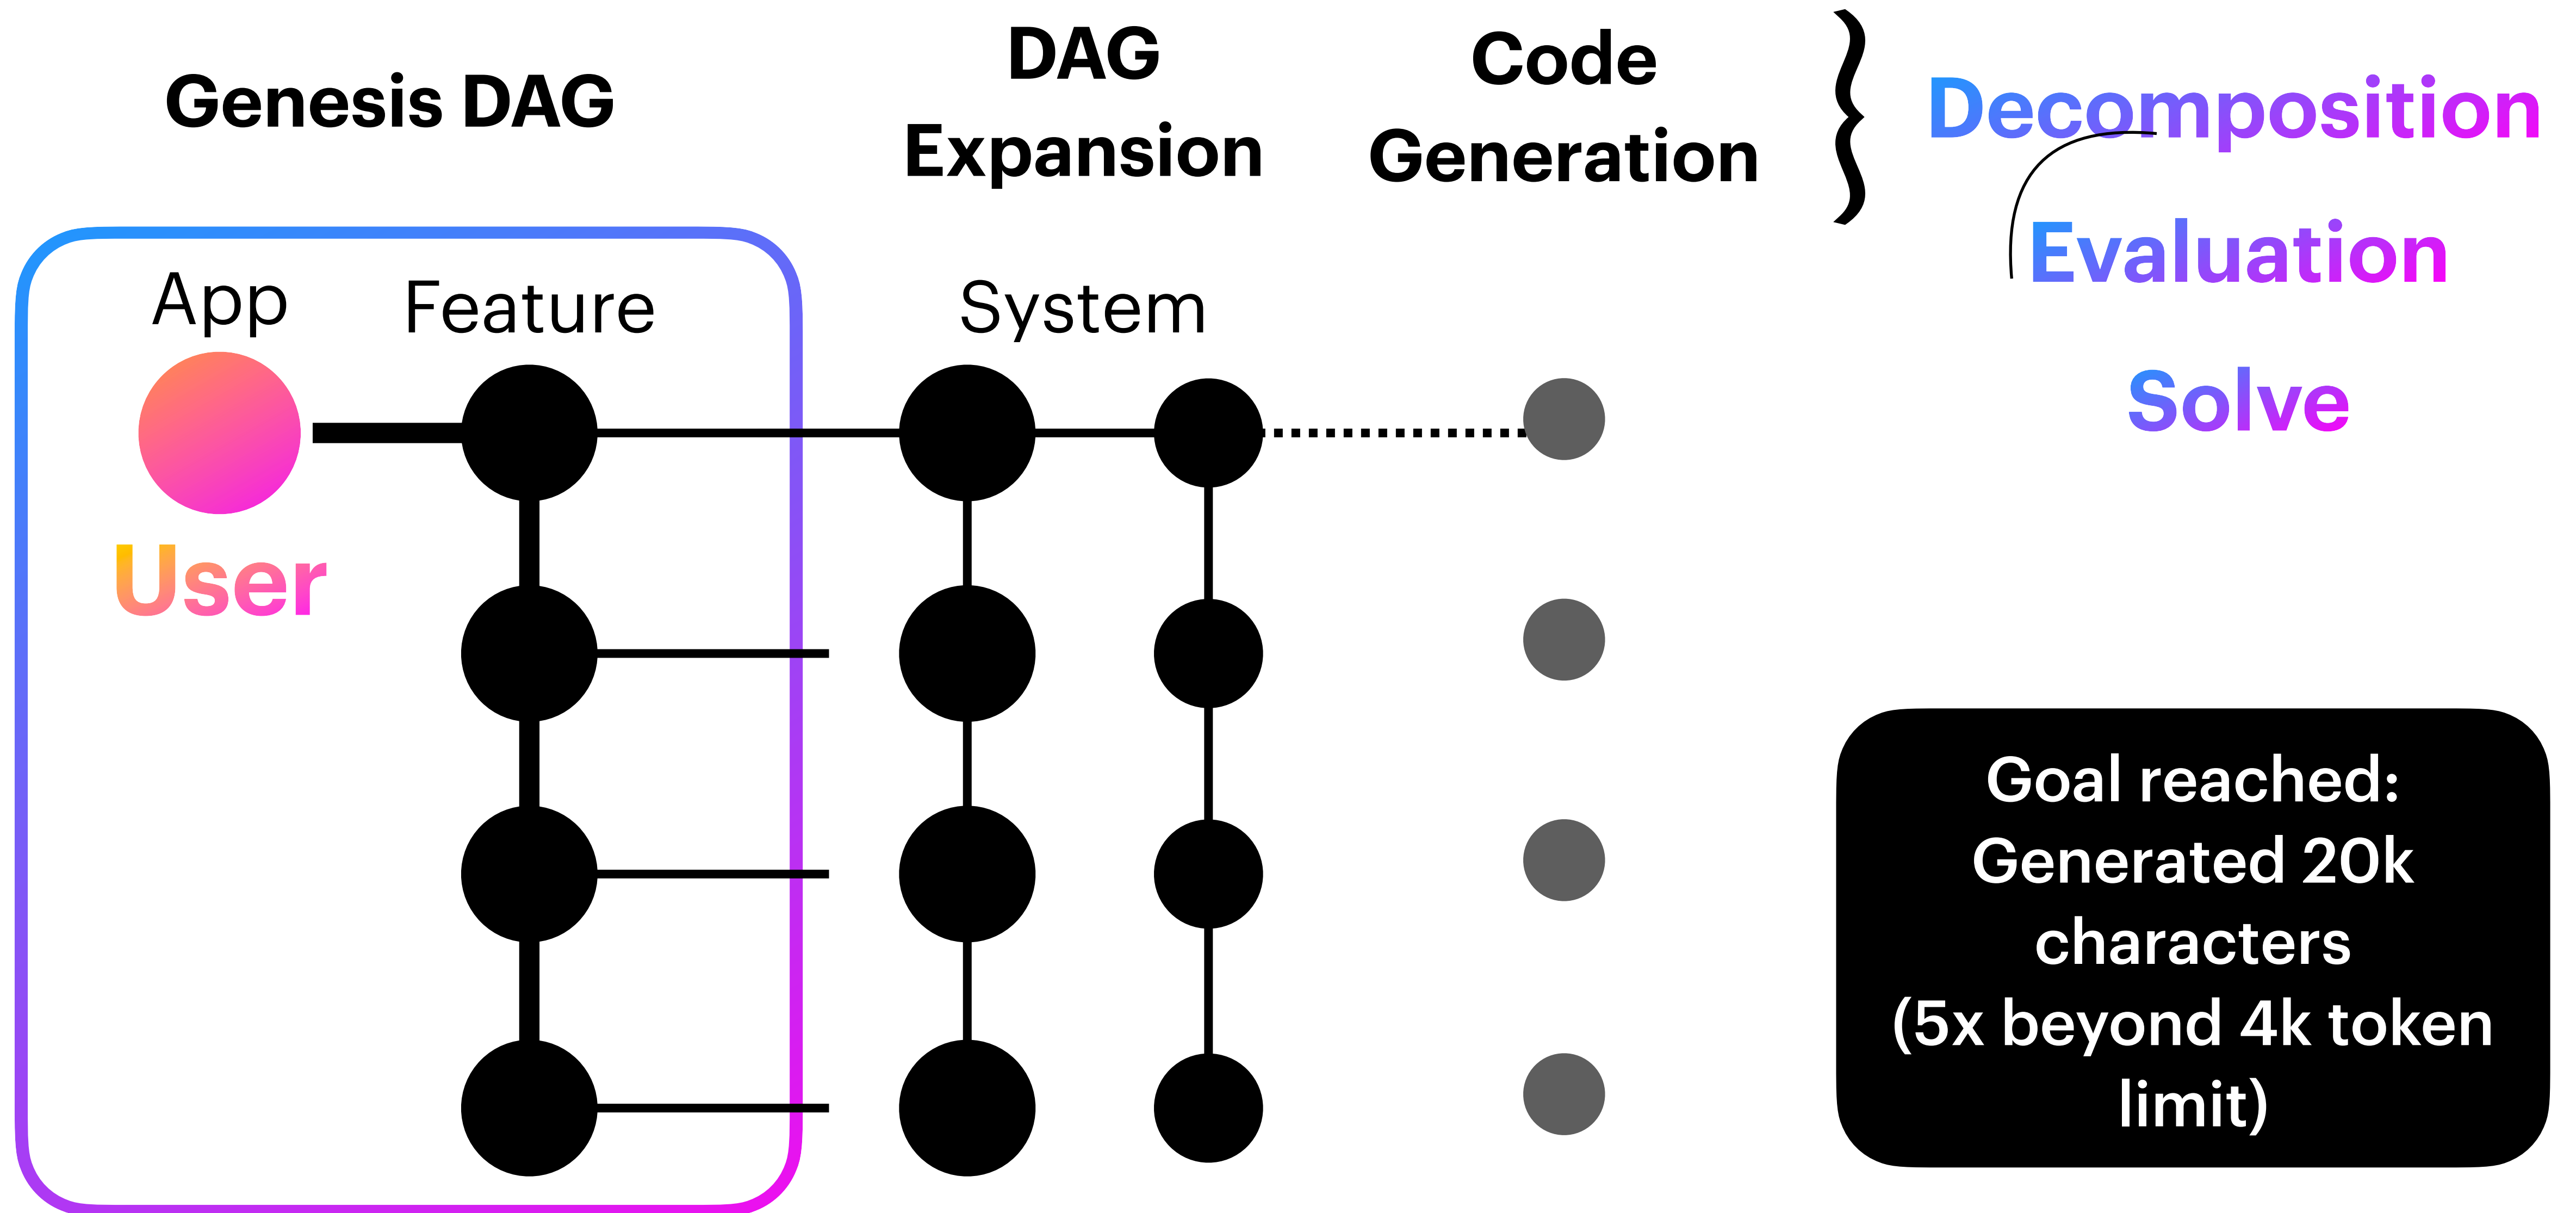

**Next Up: Write  
Research  
Papers**

# The Power of DAGs

**Solve Complex Tasks despite the 4k token limit**

- 1. Code generation**
- 2. Text generation**
- 3. Human-free loop**

# 1. Code entire App using DAGr

# 1. Code entire App using DAGr

**Goal:**

**App development:  
10 min and for \$1**

## 2. Write Screenplay
